MY EV SERVICE™ — Autobot Engineers India Pvt. Ltd.

OEM After-Sales Partner Network & Infrastructure Deck

Plug-and-play nationwide service infrastructure for electric 2W and 3W vehicle manufacturers, importers, and dealer groups.

Network-as-a-Service for EV Brands

- Instant Market Entry: Plug into an established multi-city service infrastructure without heavy capital expenditure.
- PDI & Pre-Delivery Inspections: Strict adherence to manufacturer SOPs, torque checks, and firmware validation.
- Warranty & Goodwill Processing: Digital job card evidence, photo logging, and error telemetry sent via API for instant claim approvals.
- Reverse Logistics & Battery Refurbishment: Structured pack return, safe disposal, and second-life evaluation pipelines.

Autobot OS Integration

- Open API & Webhooks: Seamless data synchronization with OEM DMS, inventory management, and CRM platforms.
- Real-Time Field Quality Telemetry: Instant failure mode analytics and telemetry feedback direct to factory R&D; teams.
- Standardized Diagnostic Tools: Factory-grade diagnostic scanners, high-voltage isolation testers, and calibrated test benches.

Technician Training & Certification

- Autobot Academy batches trained specifically on your brand models, wiring harnesses, and battery management systems.
- Strict adherence to ARAI and AIS 156 (Phase 2) thermal and high-voltage compliance standards.
